What is meaning or how can meaning of x be represented?

- What?: meaning is pretty much the readiness for an action to trigger if y happens.
- Representation?:

Not: meaning of the dog is the name "dog" ~~not~~ but the whatness of "dog" ~~is~~ is almost its meaning, no? also include the whyness, particularly if you think about tools like "table"
dog whyness? N.A., ∅

making dog with: a, b, c...
we agree that its parts/ingredients are the what but also what it does (bark). we could even go as far as to say that its relation to eat or food or play_with_ball is part of what = all ents connected equals meaning
